THE CRIME OF REASON

AND THE CLOSING OF THE
SCIENTIFIC MIND

ROBERT B.
LAUGHLIN

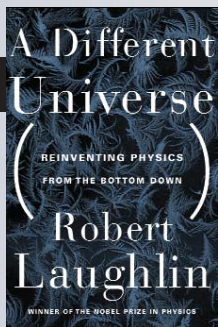

Nobel Laureate in Physics
and author of *A Different Universe*

“Provocative ... [Laughlin] paints a troubling picture of a society in which the only information that is truly valuable in dollars and cents is controlled by a small number of individuals.” — *Publishers Weekly*

This bold new book from Nobel Laureate Robert B. Laughlin challenges the Crime of Reason, the antisocial and sometimes outright illegal nature of certain intellectual activities. We all agree that the free flow of ideas is essential to creativity, and we like to believe that in our modern, technological world information is easier to share than ever before. According to Laughlin, however, acquiring information is becoming dangerous, even criminal. Increasingly, the most valuable information is considered private property or a state secret, with the result that now an entirely innocent flash of insight can infringe a patent or threaten national security. The increasing restrictions on information in such fields as cryptography, biotechnology, and computer software design are creating a new technological Dark Age of disinformation and ignorance. *The Crime of Reason* is essential reading for those at the frontiers of new ideas.

October 2008, 192 pages, 978-0-465-00507-9, \$25.95, hc
