# THE LIGHTNESS OF BEING

MASS, ETHER, AND THE UNIFICATION OF FORCES

FRANK WILCZEK

**“... Wilczek exudes a contagious excitement for discovery. A near-obligatory acquisition for circulating physics collections.” — *Booklist***

Physicists' understanding of the essential nature of reality changed radically over the past quarter century, and Frank Wilczek, winner of the 2004 Nobel Prize in Physics, played a lead role in establishing the new paradigms. Transcending the clash and mismatch of older ideas about the nature of matter and space, Wilczek presents here some brilliant and clear syntheses. Space is a dynamic material, the engine of reality; matter is a subtle pattern of disturbance in that material.

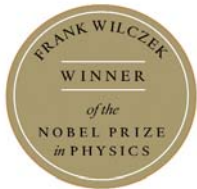

Extraordinarily readable and authoritative, *The Lightness of Being* is the first book to unwrap these exciting new ideas for general readers. It explores their implications for basic questions about space, mass, energy, and the longed-for possibility of a fully unified theory of Nature. Wilczek also presents new perspectives on many strange aspects of our fantastic universe, pointing toward great discoveries in fundamental physics likely to come and envisioning a new Golden Age in physics.

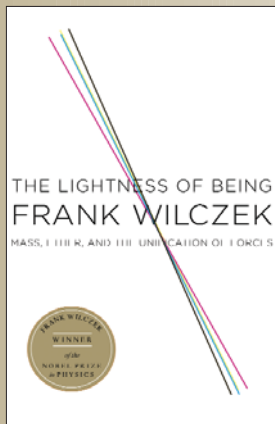

September 2008, 292 Pages, 978-0-465-00321-1, \$26.95, hc
