

NEW EDITION!

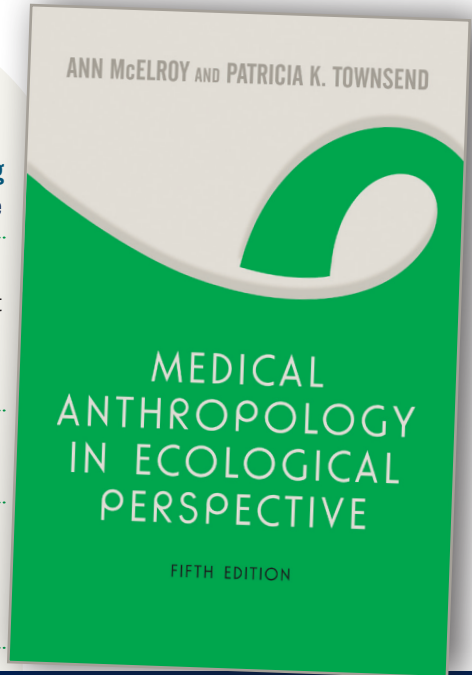

“McElroy and Townsend’s textbook is a classic, and remains the best overall introduction to medical anthropology available. ... I wouldn’t consider using any other text to introduce students to this fascinating field of study.”—Katherine A. Dettwyler, University of Delaware

Widespread awareness of emerging infectious diseases and global environmental change makes the ecological perspective of this premier teaching text for as relevant as ever. Key features of the fifth edition include:

Interdisciplinary content: The text integrates research by leading scholars from multiple fields.

Case studies: Seventeen profiles throughout the book present case studies for examining specific issues in depth.

Updated and expanded material: The fifth edition includes updated coverage of refugees; AIDS and HIV in Africa; pregnancy complications and infant survival in high-altitude regions; and infertility treatment and expanding reproductive technology.
