**“Based on an ambitious research program, and written in a clear and beguiling style, this is a book which will captivate both scholar and general reader and will be a landmark in the study of the impact of social media.”**

—Jill Conway, President emerita, Smith College, and author of *The Road from Coorain*

Consider Facebook—it’s human contact, only easier to engage with and easier to avoid. Developing technology promises closeness. Sometimes it delivers, but much of our modern life leaves us less connected with people and more connected to simulations of them.

In **Alone Together**, MIT technology and society professor Sherry Turkle explores the power of our new tools and toys to dramatically alter our social lives. This book is a nuanced exploration of what we are looking for—and sacrificing—in a world of electronic companions and social networking tools, and an argument that it will be the next generation who will chart the path between isolation and connectivity.
