“Thinking about Logic will motivate students to reflect both on fundamental notions of basic logic and on the relationship between formal reasoning and reasoning in other contexts. Undergraduate courses will be enriched and improved by adding it to the list of required readings.”

—DANIELLE MACBETH, HAVERFORD COLLEGE

This concise, thought-provoking collection of fifteen classic essays in the philosophy of logic is an ideal companion to any formal logic course or textbook. Key features include:

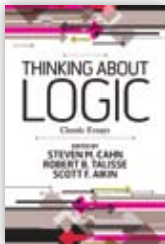

UNIQUE FOCUS: This volume challenges students to consider why we accept logical statements as true and illuminates how logic relates to perennial philosophical issues about knowledge, meaning, rationality, and reality.

ACCESSIBLE AND VERSATILE COLLECTION: Selected for their brevity, clarity, and impact, the readings do not require any specialized background and are free of unexplained jargon and notation.

ESSENTIAL GUIDING FRAMEWORK: The editors provide an introduction and discussion questions for each section.
