

New Edition from Westview Press!

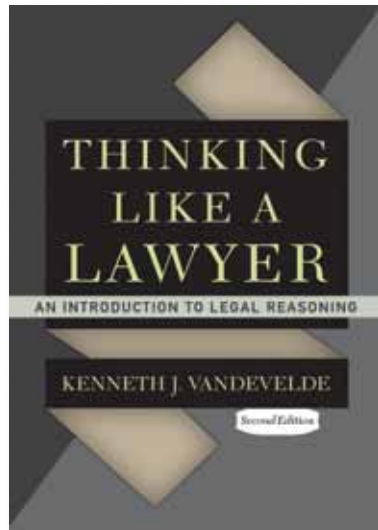

In this classic, gold-standard introduction to legal reasoning, Kenneth J. Vandeveld defines what “thinking like a lawyer” means and identifies the techniques involved in doing so. Accessible and clearly written, this book is a must for any introductory law course at the graduate level and in advanced undergraduate courses on law.

Now updated for a new generation of lawyers, the second edition of *Thinking Like a Lawyer* features:

A NEW CHAPTER on contemporary perspectives on legal reasoning, which includes new material on feminist legal theory, critical race theory, and the economics of law.

NEW SECTIONS on the legislative process and the judicial process; the significance of dissenting and concurring opinions; and the role of cognitive bias in factual determinations, on persuading a jury, on burdens of proof, and on presumptions.

A USEFUL NEW APPENDIX describes how students can apply the techniques in the book to excel in law school.
