“This is the book that those who teach international security have been waiting for: an in-depth, serious treatment of the emerging ‘human security’ paradigm. . . . Timely, important, and engaging.”

—CHRISTOPHER J. FETTWEIS, TULANE UNIVERSITY

Human Security in a Borderless World is perfect for courses on human security, security studies, or U.S. foreign policy. Key features include:

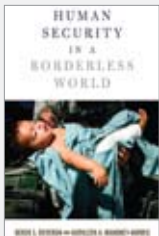

Unique and Relevant Topic: This book moves beyond the state-centric focus of “national security” to a more interdisciplinary, inclusive approach focused on “human security,” addressing issues such as globalization, climate change, pandemic diseases, failing states, vulnerable information systems, and much more.

Engaging and Thought-Provoking Pedagogy: In addition to extensive illustrations, each chapter contains several special sections that consider potential counterarguments, explore specific policy debates, and highlight concrete examples of modern security threats.
