

FORTHCOMING NEW EDITION!

This core text is the first to provide a much-needed interdisciplinary approach to international studies. The authors—including a geographer, a historian, a political scientist, and an anthropologist—describe the methodologies and interconnectedness of the disciplines and then apply that to specific regions and their relationship to the global community. Contemporary case studies in the final part of the book offer students an in-depth look at issues such as civil war and national identity. Instructor resources are available at www.internationalstudiescourse.com.

Features of the **second edition** of *International Studies* include:

- Extensive updates throughout to reflect important events over the past four years, including the global financial crisis.
- Two chapters on Asia, instead of one, with new coverage of South Asia.
- Two new global issues chapters, one on the Sudan and one on global population.
- An entirely new conclusion emphasizing the integration of the disciplines and their application.
